

SEO: Client Reporting Dashboard

Actions

You can see that there is a breakdown of our actions in several different forms:

1. Category breakdown of work in percentages
2. List of actions and a link to the work (Note that you can look at the actions for however many months the account has been active)
3. Time spent per month (Note completed hours are in green, pending hours are in yellow)
4. Action counts (Note that it lists the hours that are pending, completed month to-date, and all-time)
 - One final thing to note: throughout our dashboard there are question marks that you can hover over that will give you a brief description of what the actions are. There are also several places where you can export what you see to an excel doc.

Optimized and Tracking Keywords

Again, there is a breakdown of the keyword data, regardless of whether they're optimized or tracking keywords.

NOTE: Optimized keywords are what we're using the campaign budget and hours towards. Tracking keywords simply allow us to show where some chosen keywords are organically ranking; we're not using any budget towards these keywords.

Breakdown of what we show (from left to right):

1. Link to Google so you can see where the keyword is ranking in real-time
2. The start rank of the keyword since we put it in the campaign
3. The average ranking of the keyword
4. The current rank of the keyword—we pull the best ranking from the previous week
5. A graph that shows the history of the keyword since it's been entered into the campaign – see graph opened up below.

Google Analytics Imported in SEO Analytics

If we're able to obtain access to the client's Google Analytics and Search Console, we will connect their GA Analytics to the dashboard.

Listed is traffic sources, trends, and what page viewers are going to. We can track the reporting from the last 30 days to the last 6 months.
